Manntree®
— Paint My Love—

Would you prefer a dark or light wall?

The white material is designed for batiste, you can add any color you like.
Taking into account the colouring ratio of different colors, we will distinguish the dark and light colors, which will reduce the addition rate of your original colouring paste by more than 50%, helping you reduce the cost of large areas.

Renewable design concept.

We use food-grade ingredients, non-toxic formulations, and complete all our work in a 100% sterile workshop.

The use of silver paste in batiste

This is another masterpiece. As the shiny silver slurry was mixed into batiste, we could see that it seemed to have renewed its vitality.
The move is a tribute to more modern experiences, unbowed to the mundane.

You'll enjoy a more open visual space.

When the light hits the wall, you get up to 30 percent refraction, which makes your space brighter.

Mix and match creative colors.

If the existing home color scheme cannot satisfy you, you can try more color schemes. We suggest that you can use the same color scheme with multiple colors to present more colorful colors on the wall.

batiste.

This product is called batiste, and it's an amazing product. You can watch some introduction of this product in use, so that you can use this product more correctly.

100,000 times wash!

Excellent creative space for graffiti.
Through different testing methods, we got the data of 100,000 times of washing. And the water pen/chalk can be rubbed off, just use your wet towel!
Your child or pet will love this.

Better CHOICE

- Consider that you may not be so keen on normal coloring
- Or you question the number of times its surface can be scrubbed
- There is no relationship
- Our home is always changing
- Mannntree gives you more wall effects to choose from
- Now, use different plastic tools
- You can get a lot of different patterns

Mannntree Group
